

ARUN KUMAR

Data Analyst

Chennai, Tamil Nadu, India | arun.kumar@email.com | +91 98765 43210
LinkedIn: linkedin.com/in/arunkumar | GitHub: github.com/arunkumar

PROFESSIONAL SUMMARY

Data Analyst with **3+ years of experience** in data analysis, business intelligence, reporting, and data visualization. Skilled in **SQL, Python, Excel, Power BI, Tableau, and statistics**. Experienced in transforming raw business data into actionable insights, developing interactive dashboards, automating reports, and supporting data-driven decision-making.

TECHNICAL SKILLS

Programming & Analysis: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

Database & SQL: SQL, MySQL, PostgreSQL, SQL Server, JOINS, Subqueries, CTEs, Window Functions, Stored Procedures

Data Visualization & BI: Power BI, Tableau, Excel, Power Query, DAX, Pivot Tables

Data & Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Statistical Analysis, KPI Analysis, Business Reporting

Other: Git, GitHub, REST APIs, Microsoft Azure, Agile / Scrum

PROFESSIONAL EXPERIENCE

Data Analyst | ABC Technologies Pvt. Ltd. Chennai, India | Jan 2023 – Present

- Analyzed large datasets using **SQL and Python** to identify business trends, performance gaps, and customer behavior patterns.
- Developed and maintained **Power BI dashboards** for sales, revenue, customer, and operational KPIs.
- Cleaned and transformed raw data using **Python Pandas and Power Query**, improving data quality and reporting accuracy.
- Created complex SQL queries using JOINS, CTEs, subqueries, and window functions to generate business reports.
- Automated recurring Excel and reporting processes using Python, reducing manual reporting effort by approximately 40%.
- Performed exploratory data analysis to identify trends, anomalies, and relationships within business datasets.
- Worked with business stakeholders to understand reporting requirements and convert them into analytical solutions.
- Presented analytical findings and dashboards to management to support data-driven decision-making.

Junior Data Analyst | XYZ Solutions Chennai, India | Jun 2021 – Dec 2022

- Extracted and analyzed business data using SQL and Excel.
- Prepared weekly and monthly management reports covering sales, revenue, and operational performance.
- Built Excel dashboards using Pivot Tables, Power Query, formulas, and charts.
- Performed data validation and reconciliation between multiple data sources.
- Supported senior analysts in developing Power BI reports and dashboards.
- Identified data inconsistencies and collaborated with technical teams to resolve data-quality issues.

PROJECTS

Sales Performance Analysis Dashboard | Power BI, SQL, Excel

- Developed an interactive Power BI dashboard to analyze sales performance across regions, products, and sales representatives.
- Created KPIs for total revenue, profit, sales growth, average order value, and monthly performance.
- Used SQL to extract and transform data before loading it into Power BI.

Customer Churn Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Analyzed customer data to identify factors associated with customer churn.
- Performed data cleaning, preprocessing, and exploratory data analysis using Python.
- Created visualizations to identify churn patterns across customer segments.

Employee Attrition Analysis | Python, SQL, Power BI

- Analyzed employee data to identify trends related to employee attrition.

- Used SQL for data extraction and Python for data cleaning and analysis.
- Created a Power BI dashboard showing attrition by department, age group, experience, and job role.

EDUCATION

Bachelor of Engineering – Computer Science | ABC Engineering College, Chennai | 2017 – 2021

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- SQL for Data Analysis – Certification
- Python for Data Analysis – Certification
- Microsoft Azure Fundamentals (AZ-900)

KEY ACHIEVEMENTS

- Reduced manual reporting effort by **40%** through reporting automation.
- Developed **15+ Power BI dashboards** for business and operational reporting.
- Improved reporting accuracy by implementing automated data validation processes.
- Analyzed datasets containing **1M+ records** using SQL and Python.
